# Sales Performance Analysis

**DATA ANALYST:** AUGUSTINE EGWUATU

**TOOLS:** EXCEL & SQL

**DATE CREATED:** 25 MARCH, 2026

# Business Problem

A nationwide retail business wants to understand their revenue performance across products, regions and time to improve decision-making.

# Objectives

- Analyze Total Revenue
- Identify Top Products
- Evaluate Regional Performances
- Understand Sales Trends

# Data Overview

- 12,000+ Records
- 5 States
- Multiple Product Categories

# Data Cleaning

- Converted to structured table
- Removed inconsistencies
- Verified calculations
- Created Month column

*Data processing stage*

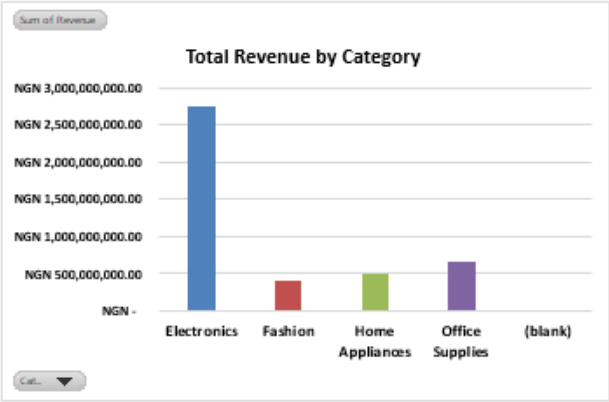
# Sales Performance Dashboard

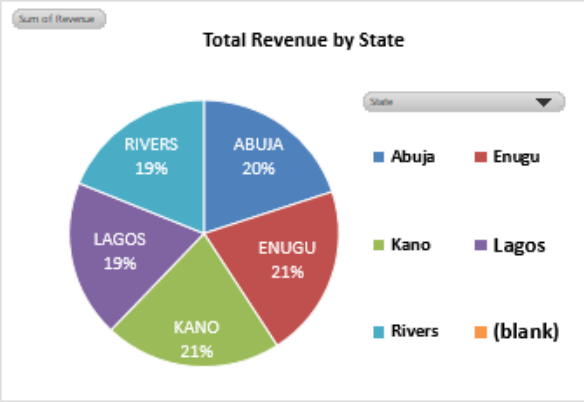
*Dashboard using Excel*

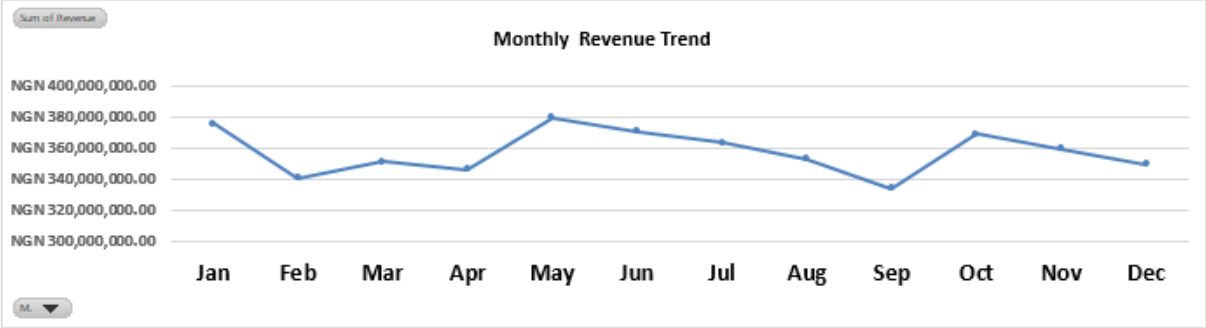
**KPI 1**
**Total Revenue**
**NGN 4,298,197,276.00**

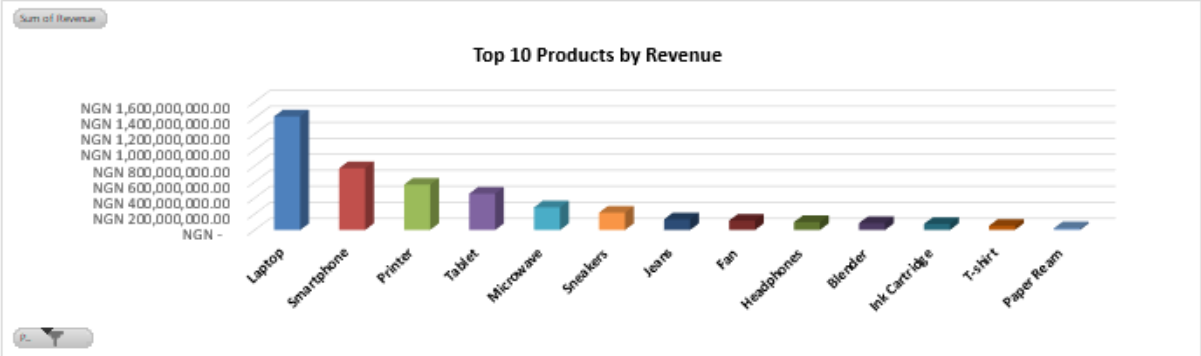
**KPI 2**
**Total Quantity**
**35955.00**

**KPI 3**
**Total Orders**
**12001.00**









**State**
- Abuja
- Enugu
- Kano
- Lagos
- Rivers
- (blank)

**Category**
- Electronics
- Fashion
- Home Appliances
- Office Supplies
- (blank)

Interactive dashboard enables filtering by state and category, built to visualize key metrics and trends for deeper analysis.

# SQL Analysis

**SQL query used to analyze the total quantity vs total revenue for each product:**

```
SELECT
    Product,
    SUM(Quantity) AS total_quantity,
    SUM(Revenue) AS total_revenue
FROM clean_sales_data_SQL1
GROUP BY Product
ORDER BY total_revenue DESC;
```

| | Product | total_quantity | total_revenue |
|---|---|---|---|
| 1 | Laptop | 227800 | 1419097781 |
| 2 | Smartphone | 211500 | 772424860 |
| 3 | Printer | 301500 | 567354009 |
| 4 | Tablet | 227400 | 452142698 |
| 5 | Microwave | 298200 | 282621155 |
| 6 | Sneakers | 308700 | 217024343 |
| 7 | Jeans | 310800 | 133449741 |
| 8 | Fan | 316100 | 116677107 |

# SQL Analysis

**SQL query used to analyze the category revenue percentage performance:**

```
SELECT Category,
    SUM(Revenue) AS revenue,
    ROUND(100.0 * SUM(Revenue) / (SELECT
SUM(Revenue)
FROM clean_sales_data_SQL1), 2)
FROM clean_sales_data_SQL1
GROUP BY Category
ORDER BY revenue DESC;
```

| | Category | revenue | percentage |
|---|---|---|---|
| 1 | Electronics | 2743458222 | 63.83 |
| 2 | Office Supplies | 664674496 | 15.46 |
| 3 | Home Appliances | 487055071 | 11.33 |
| 4 | Fashion | 403009487 | 9.38 |

# Key Insights

- Electronics contributes 63% of total revenue with  N2.74B, makes it primary revenue driver.
- Sales are concentrated in top products (Laptops, smartphones).
- Regional Performance varies across months
- Monthly revenue trend fluctuates unevenly.

| | Category | revenue | percentage |
|---|---|---|---|
| 1 | Electronics | 2743458222 | 63.83 |
| 2 | Office Supplies | 664674496 | 15.46 |
| 3 | Home Appliances | 487055071 | 11.33 |
| 4 | Fashion | 403009487 | 9.38 |

# Recommendations

- Increase investments in High-Revenue Products (Electronics)
- Improve Underperforming Categories (Fashion & Others)
- Optimize Regional Sales Strategy
- Address Monthly Revenue Fluctuations.

# Conclusion

The analysis identifies key revenue drivers, highlights regional and product performance gaps, and provides actionable strategies to optimize revenue and support data-driven decision-making.

*Thank you.*

# Skills Demonstrated

- Data Cleaning & Transformation
- Explorative Data Analysis (EDA)
- SQL Data Aggregation & Querying
- Dashboard Development (Excel)
- Business Insight & Decision Support
